SAN JOSÉ STATE UNIVERSITY

Dear Campus Community-

I am pleased to share an update on our [Classroom project](#) to upgrade and future-proof the technology in our classrooms and learning spaces across the San Jose State University campus.

We've made significant progress on updating the 35 classrooms selected which include brighter LED projectors, enhanced AV control system, HDMI and USB-C inputs.

We are currently at the midpoint of the installation phase, with multiple teams collaborating on the AV equipment installation. The classroom upgrades are on track for completion by the first week of August, ensuring the classrooms will be ready for the beginning of fall semester. Training guides will be available in each upgraded room and the SJSU IT IMS team is available to provide support and answer questions.

We greatly appreciate everyone's feedback on this project and we are looking forward to the enhancements this will bring to the classroom experience. We also want to send our appreciation and gratitude to our campus partners within Academic Affairs, FD&O, SJSU IT Networking, and IMS teams for their contributions towards this project. Finally, our special thanks go out to Bruce Gardner for his leadership in executing this project and to the [Steering Committee](#) for their invaluable feedback and guidance.

List of rooms to be updated (rooms in bold are complete, remainder of rooms will be updated by 8/5/25)
Boccardo Business Complex: 103, 105, 130, 203, **225**, 323, **324**, **326**
